WHO AM I?

Experienced .NET programmer with a demonstrated history of working in the computer software industry. I have worked in more than 10 different projects and have a proven track record of delivering high quality software. I was also a key member of the team that spearheaded the development of the first version of the application.

SKILLS

- C# & C/C++ & Rust & Python
- Software Architecture Design
- Database Design
- Data Structure
- Design Patterns
- Microsoft Azure

EXPERIENCE

2020 – Current

Senior Full Stack Developer Gooshishop - Hasin Technology.

I am a senior software engineer working on a large legacy E-Commerce solution. The main challenges are:

- Maintaining project and fixing numerous bugs and issues.
- Optimizing many actions and easing the sales process.
- Choosing the best open source E-Commerce solution and implementing our needs in that.
- Migrating the whole system to new product.

I'm proud to say I have improved some actions up to 60% and Added so many features in these years.

```
ASP.NET MVC / ASP.NET Core / SQL Server / PostgreSQL / ElasticSearch
```

2020 – 2020

Part-Time Senior Full Stack Developer iTelemed - Canada Telemedicine Group Inc.

I was a part-time senior full stack developer on a fully online medical solution. Main challenges were:

- Developing the project as fast as possible because of the covid situation.
- Developing a lot of features that were not available at that time.
- Reaching an architecture to enable us to scale the project.

Online visiting (video chat), text chat, ticketing and managing patients were some of features built in a 3 month work.

```
ASP.NET Core / SQL Server / SignalR
```

2019 – 2021

Senior Back End Developer Algorithm Pars.

I was a senior developer working on a legacy project which was widely in use in large companies. The main challenges were:

- Keeping a legacy software as update as possible to keep the project running smoothly.
- Minifying the cost of maintaining the project.
- Creating a transition phase in order to migrate to .Net Core
- Designing and developing a new framework to migrate from Web Form to ASP.NET Core.

I was a key person in this project and had a good collaboration with project manager. I had reduced more that 20% of the line of code and we have improved the performance more than 15% through years.

```
ASP.NET Core / ASP.NET WebForms / SQL Server
```

| 2018 – 2019 | **Software Consultant & SEO Manager** | **Sunseir Travel Agency** |

Working with my nice colleagues on a website that implements both B2B and B2C business models which handles a very high amount of request. Also improving "Sunseir" brand, advertising and SEO on aside.

```
ASP.NET Core / SEO Tools
```

| 2017 – 2019 | **.Net Developer** | **Dipeh.ir** |
| Freelance | | |

Dipeh is a website to explore about books, authors and publishers. The main goal in this project was designing a software with very specified requirements Another important goal was reaching nice performance through maximum code optimization.

```
ASP.NET MVC / SQL Server / Bootstrap
```

| 2016 – 2018 | **Junior Developer & SEO Manager** | **Mehr -o- Mah Travel Agency** |

This was my first official job as developer. It was a large-scale app with lot's of functionalities that brightened me to professional programming.

```
ASP.NET MVC / SQL Server / Bootstrap / SEO Tools
```

EDUCATION

| 2016 – 2018 | **Master's Degree** | **Islamic Azad University, Najafabad Branch** |

I focused on software engineering and software development during MS and therefore my thesis was about predicting software bugs and defects early during development

| 2012 – 2016 | **Bachelor's Degree** | **Zanjan University** |

LANGUAGES

- **Persian** - Native
- **English** - Proficient
